

# TOP 5 TECH TOOLS FOR RESTAURANTS

## Inventory Control System

Ensures correct stock levels and ensures goods are not leaving the restaurant without being sold.

## Pay at the Table Solution

When the card never leaves the customer's hand, the liability of your business decreases, leading to fewer cases of fraud and identity theft.

## Social Networking

Helps familiarize your customer base with your restaurant and its cuisine well before they step foot in your establishment.

## Location Based Services

Businesses can reward customers for "checking in", post online specials and even offer in-store incentives.

## Online Menus

Patrons can access a Menu app from their smartphones, enabling your customers to browse your digital menu, showing off all your gourmet dishes.
